Dairy Farmer Participates in Haldimand County Hydro Incentive Program

February 9, 2010, Caledonia, ON – Dairy Farmer Howard Stobosser now has over 100 relieved cows with the help of Haldimand County Hydro's Electricity Retrofit Incentive Program (ERIP).

Mr. Stobosser recently had 3 large energy efficient ventilation fans installed in his 5 year old dairy barn to assist with summer ventilation for his cattle. Without the help of the ERIP program, this project likely would not have been possible for Mr. Stobosser. Like Mr. Stobosser, many farmers and business owners are on the fence about whether or not to make efficiency retrofits and investments. That is why programs such as ERIP, funded by the Ontario Power Authority and delivered in cooperation with Haldimand County Hydro, are so valuable.

"The conservation programs for businesses offered by Haldimand County Hydro often help our customers undergo retrofits that they otherwise would not have been able to complete" said Jane Albert, Haldimand County Hydro Consumer Services Manager. "We are very pleased with the participation in ERIP with over \$40,000 paid in incentives and look forward to helping customers benefit in 2010 with more funding being available to businesses for their lighting projects".

Businesses interested in ERIP should contact Haldimand County Hydro at 1-877-872-2570 or visit their website at www.erip.ca.
